Dear Mr. Cheng,

RE: HKUST Dean of Engineering Scholarship and New JUPAS Choice – Engineering + AI

We are very pleased to inform you that LI Ka Yan from your school has been awarded the HKUST Dean of Engineering Scholarship 2020.

The HKUST School of Engineering is extremely gratified that we continue to admit a large pool of excellent students in 2020. LI Ka Yan is among the very best of this group, and will build the way to ultimate successes with the guidance from our top-notch faculty members. To give kudos to this excellent achievement of HKDSE students, the Dean of Engineering Scholarship is bestowed to those with at least one 5** or two 5* in the HKDSE Exam in one sitting.

However, with the highest importance placed on the health and best interests of guests and our students, we regret that we are unable to run the scholarship presentation ceremony as in the past. Nonetheless, thankful to technology, which keeps us connected beyond social distancing, our latest admission talks are now available at <https://join.ust.hk/our-programs/school-of-engineering> to keep you and your teachers posted of the latest developments in our School.

Among these exciting developments is the introduction of a new program - *Engineering with an Extended Major in Artificial Intelligence (AI)*. We are proud to announce that, beginning with JUPAS 2021, students can now select this new program as one of their JUPAS choices. To allow us to share more in-depth information of the new AI program, we would like to invite you and your teachers to join our Zoom Webinar with details as follows:

Date	:	23 November 2020 (Monday)
Schedule	:	2:00 – 2:40pm Introduction of Engineering + AI 2:40 – 3:00pm Q&A
Host	:	Prof Albert CHUNG, Associate Dean of Engineering (UG Studies)
Platform	:	Zoom
